

## Information Security Commitment

At Weald IT, information security is fundamental to the services we provide. We are committed to protecting the confidentiality, integrity and availability of company and client information through appropriate technical, organisational and procedural controls.

Our approach to information security includes:

- Access controls and least-privilege principles
- Multi-factor authentication (MFA)
- Encryption of portable devices and sensitive data
- Security monitoring, backup and recovery processes
- Staff security awareness training
- Controlled supplier and third-party access
- Incident reporting and response procedures
- Ongoing review and continual improvement of security controls

Weald IT maintains policies and procedures aligned with recognised information security best practice and ISO/IEC 27001 principles.

Security and privacy enquiries can be directed to:
